Experience It! _____ Monteverde Cloud Forest

There are only four places in the world with an ecosystem so unique that it produces a cloud forest — the Monteverde Cloud Forest in Costa Rica is one. Situated high on a mountain, the cloud forest is created when the arid air from the forest below the mountain combines with the moist, hot air of the rainforest. The result is a blanket of misty, wispy clouds that linger low in the forest, making it feel as if it were raining. This rare environment breeds a diverse world of exotic flora and fauna. One of the cloud forest's most famous residents is the endangered resplendent quetzal. A remarkably colorful bird, this creature sports a golden beak that protrudes from a green-hooded head. Its breast is a vibrant scarlet and the tail feathers are gray, black and white. A highly elusive bird, quetzal sightings are rare but absolutely unforgettable.
